Oscar G. Schilke

As co-author with the late Oscar G. Schilke, an accomplished numismatist and avid collector, of "**America's Foreign Coins**," I wish to emphasize the importance of the coins involved.

The challenging and fascinating foreign coin legal tender series is of particular significance to collectors of United States as well as foreign coins. Specie minted abroad, that qualified as legal tender in this country, was integrated with domestic mintage and was on a par with United States hand-to-hand money. These foreign coin types; in large measure, influenced the origin, size, weight and fineness, and even the extent of circulation of domestic coins. Over six decades were to pass, after the establishment of the United States Mint, before the foreign coins were finally demonetized in 1857, four years before the American Civil War.

In addition to being part of Americana Numismatica, the coins are intriguing to collectors of foreign coins, as the series is comprised of some the most numismatically interesting and beautiful types issued by many leading nations and minting colonies. Specialists in the coinage of the various countries represented may check the dual role of specie serving as money where intended, and the same types as United States media of exchange.

PISTAREENS AND PARTS

Pistareens and fractions were not regarded as parts of the Spanish milled dollar, and therefore not technically legal tender in the United States on a federal basis. Because pistareens circulated in this country, collectors include them for comparison with the legal tender Spanish silver coins.
